

MAIWAND ALAMZOI CONSULTANCY

Engineering · Data Science · Geospatial AI

Founder: Maiwand Jan Alamzoi | Leuth, Netherlands | +31 682 120 115 | contact@alamzoiconsultancy.com | zaminai.org | KVK 42083664 (SBI 71120 & 62200)

WHAT I DO

- ▶ **AI & Machine Learning** — Custom models for classification, regression and time-series forecasting — turning raw business or field data into predictions and decisions.
- ▶ **Geospatial & Remote Sensing** — Satellite-data pipelines (Google Earth Engine, Sentinel-2), field-level monitoring, NDVI/EVI analysis, mapping.
- ▶ **Data Pipelines & Dashboards** — End-to-end pipeline design, database setup (PostgreSQL), Power BI / Streamlit dashboards and reporting.
- ▶ **AI Assistants & LLM Integration** — Chatbots and advisory assistants built on Claude / Gemini APIs, including multilingual support.
- ▶ **Engineering & IoT** — CAD / machine design, sensor integration, IoT data pipelines for physical-world systems.
- ▶ **Training & Advisory** — Technical training on data tools; programme and policy advisory (M&E, project cycle management) for development-sector clients.

WHO I HELP

- ▶ Dutch SMEs that want to use AI and data but don't have in-house expertise.
- ▶ AgriTech and precision-agriculture companies.
- ▶ Research institutions, NGOs and development-sector organisations running EU- or UN-funded projects.

WHAT I'VE DONE

- ▶ Designed and deployed ZaminAI, a live satellite-intelligence platform (zaminai.org), solo — from data pipeline to public product.
- ▶ Built ML models reaching ~87% accuracy for early crop-stress detection on EU-funded projects (Agrisim & Rapagra).
- ▶ Led a national mechanization programme for Afghanistan's Ministry of Agriculture — a team of 15+ across 34 provinces.
- ▶ FAO (UN) Expert Roster member; policy consultant on the FAO On-Farm Water Management project.
- ▶ Winner, IFA × Wageningen University & Research Hackathon (2026).

HOW I WORK

- ▶ I own the whole pipeline — from data collection to a deployed product, dashboard or report — so clients get one point of contact, not a hand-off between specialists.
- ▶ Clear, jargon-free communication with non-technical stakeholders.
- ▶ Flexible engagement: single project, hourly consulting, or an ongoing retainer.
- ▶ Deepening software engineering and advanced ML skills through applied project work alongside client delivery — I build real capability by solving real problems, not just on paper.

CREDENTIALS & LANGUAGES

M.Tech, Agricultural & Food Engineering — IIT Kharagpur, India (Nuffic-evaluated as equivalent to a Dutch wo master's, ref. C125446).

Languages: English (C1) · Dutch (B2) · Dari (native) · Pashto (native) · Russian (B2) · Hindi/Urdu (proficient)
